Art Unit: 1652

DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-4, 7-10, 13-16 and 19-22 drawn to a DNA encoding protein variants of a protein comprising "an" amino acid sequence represented by a SEQ ID NO: or DNA fragment comprising a nucleotide sequence represented by a SEQ ID NO: .

Group II, claim(s) 5-6, 11-12, 17-18 and 23-24 drawn to protein variants of a protein comprising "an" amino acid sequence represented by a SEQ ID NO:.

Group III, claim(s) 25, drawn to a fusion protein comprising variants of a protein comprising "an" amino acid sequence represented by a SEQ ID NO and a peptide tag.

Group IV, claim(s) 26-27, drawn to an antibody to protein variants of a protein comprising "an" amino acid sequence represented by a SEQ ID NO:.

The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The invention of Group I is drawn to a multitude of DNA fragments that encode a variety of peptides and proteins, the invention of Group II is drawn to a variety of peptide and protein variants, the invention of Group III is drawn to fusion proteins comprising a

Art Unit: 1652

variety of proteins and peptide variants, whereas the invention of Group IV is drawn to antibodies against variety of proteins and peptide variants.

Accordingly, Groups I-IV are not so linked by the same or a corresponding special technical feature as to form a single inventive concept.

Restriction Requirement Applicable to all Groups

Furthermore, the presence of multiple polypeptide sequences and polynucleotide sequences, each with a different SEQ ID NO: allows for a variety of patentably distinct products. Depending on the sequence of each polypeptide and polynucleotide, the characteristics of the resulting molecule will vary in regards to structure and function. Each one of these polypeptides is capable of eliciting a specific immune response and can be used to produce a specific antibody; also each one of the mentioned polynucleotides is capable of hybridizing to different probes and is capable of encoding a characteristically different peptide in regards to structure and activity. Therefore these polypeptides and polynucleotides are patentably distinct absent factual evidence to the contrary. Rejoinder of all or a specified subset of the sequences is possible if Applicants provide a single and specific representative subsequence found in all or a specified subset of the sequences for search, and state that all or a specified subset of the sequences are not patentably distinct. Applicants are informed that if their specified sequence is found that all or a specified subset of sequences are obvious over that prior art sequence.

Applicant is required to elect a single SEQ ID NO: for prosecution on the merits.

The applicant should be aware that selection of a single SEQ ID NO: represents a

Application/Control Number: 10/581,158 Page 4

Art Unit: 1652

response to a restriction requirement of a patentably distinct product, not an election of species.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert B. Mondesi whose telephone number is 571-272-0956. The examiner can normally be reached on 9am-5pm, Monday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ponnathapu Achutamurthy can be reached on 571-272-0928. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
